

What Is PROFHILO®?

Tap the Links in **WHITE**

Profhilo® is the first BDDE*-free stabilised injectable hyaluronic acid (HA) based product for treating skin laxity.

With one of the highest concentrations of HA on the market (64mg / 2ml), it not only boosts and hydrates the skin, but also remodels ageing and sagging tissue.

Profhilo® delivers great results as a treatment on its own or in combination with other aesthetics treatments currently on offer.

*1,4-butanediol diglycidyl ether

Nahyco Technology

Profhilo® is not a dermal filler; in fact it has opened up a new injectable category...Bio-remodelling!

Profhilo® comprises of high and low molecular weight HA which is thermally cross linked. It is these properties that result in the dual action of "the lift effect" and "the hydro effect" that are ideal for remodelling skin laxity.

Injectable Product Of The Year 2016

Profhilo® is creating a real buzz, with Practitioners referring to it as "something they have been waiting for" or as "the most exciting development in injectable treatments in a long time".

BIOCOMPATIBLE

because it's composed of a highly pure grade hyaluronic acid produced by biofermentation.

SECURE

due to its high purity and absence of additives, PROFHILO® offers greater safety and therefore reduced side effects.

EFFECTIVE

the patented technology of PROFHILO® offers a prolonged duration.

INNOVATIVE

the composition:
It's unique with 64 mg of HA, the result of patented technology;

the injection technique:
Only 5 points of injection are needed to offer a maximum comfort treatment;

the treatment protocol:
Visible results after only 2 sessions (1 month)
